

UPSTOX

Helping beginners understand before they decide.

A product case study on improving the first-investment experience through contextual research, not more information.

Hrishabh Raj

Product Management Intern Portfolio

Beginners can access investment information — but struggle to turn it into a clear understanding before deciding.

I started with the user's uncertainty

150

Survey responses

111

Investors (39 non-investors)

34

Investors fear losing money

2.92 / 5

Avg. confidence before first investment

- Primary survey, analysed in Power BI
- Secondary audit of the live Upstox stock page
- No interviews were completed — so no quotes or personas built on them
- 16 respondents use Upstox as their main platform — directional only, not a benchmark
- Self-reported data: patterns, not causes

HARDEST PART OF STARTING

BIGGEST CONCERN

WHERE THEY RESEARCH

ONE IMPROVEMENT WANTED

Three signals changed the problem

01

CHOICE

26

struggled with what to invest in

PM IMPLICATION

Decision uncertainty

02

RISK

34

feared losing money · 21 struggled to understand risk

PM IMPLICATION

Understanding downside is central

03

FRAGMENTATION

27 · 21 · 19 · 18

YouTube · friends/family · social · Google

PM IMPLICATION

Users stitch understanding together across sources

The existing product already has the ingredients

Price, 1D chart and
"Featured in" discovery tags

"What's in news?": visible
cards are market roundups

About, market cap, revenue
and growth rate

Financial performance,
Events, Competitors

Upstox already
provides
substantial
investment
information.

That changed
my solution.

I don't need another
information source. I
need to reduce the
work required to
connect the existing
ones.

INFORMATION EXISTS. INTERPRETATION IS THE BOTTLENECK.

The opportunity is contextual synthesis at the Evaluate → Decide moment.

Where the beginner needs the most help

The user has enough raw material. The remaining job is deciding what matters, how signals relate and what deserves attention.

Understand this stock

Concept prototype. Prices shown are demo data for UX.

CONTEXTUAL

Appears inside the stock page.

SYNTHESIS-FIRST

Brief before chat.

EVIDENCE-BACKED

Every material insight has a Why? path.

DECISION-PRESERVING

Helps users understand without deciding for them.

The brief is the product — chat is secondary

- 01 What's happening?
- 02 Business health
- 03 Valuation context
- 04 Price & trend
- 05 What's driving it?
- 06 Key risks
- 07 Relevant news
- 08 Evidence / Why?

Concept screens · P/E and sector figures illustrative

Insight → Why → Evidence → Caveat

News should answer: "why does this matter?"

Relevant to Infosys

COMPANY

Why? >

Company announcement

Why it matters **Execution / revenue visibility**

RESULTS

Why? >

Latest reported results

Why it matters **Growth / margins / profitability**

SECTOR

Why? >

IT-sector development

Why it matters **Demand / client spending**

EVENT

Why? >

Material corporate event

Why it matters **Capital allocation / business structure**

NEWS

RELEVANCE

EVIDENCE

CAVEAT

Proposed design concept: card labels are illustrative, no real headlines shown.

Make every conclusion traceable

WHY

Supporting financial data

SOURCE

Reported financial data / company financials

INTERPRETATION

Revenue growth can indicate stronger reported business activity

CAVEAT

It does not predict future stock returns

Figure from the live Upstox Infosys screen. Panel layout adapted from the concept prototype.

What I would ship first

MVP

- ✓ Understand this stock
- ✓ Research Brief
- ✓ Business health
- ✓ Valuation
- ✓ Price / trend
- ✓ Relevant news
- ✓ Risks
- ✓ Evidence
- ✓ Ask AI

DELIBERATELY OUT

- × Buy / Sell engine
- × Target price
- × Price prediction
- × Autonomous trading
- × Portfolio auto-changes

The goal is better understanding, not more aggressive trading.

How I would know it works

CONTROL

Existing research experience

VS

TREATMENT

Existing experience +
Research Copilot

"Evaluate Infosys and explain the three things you would want to understand before deciding."

COMPREHENSION (primary)

EVIDENCE TRACEABILITY

TASK COMPLETION

TIME TO UNDERSTANDING

GUARDRAILS Recommendation confusion · Unsupported claims · False confidence · Information overload

**I didn't add more information.
I reduced the work required to
understand it.**
